Settings

Users can set preference on appearance (light mode / dark mode), notifications (to notify recording of expenses every day), etc.
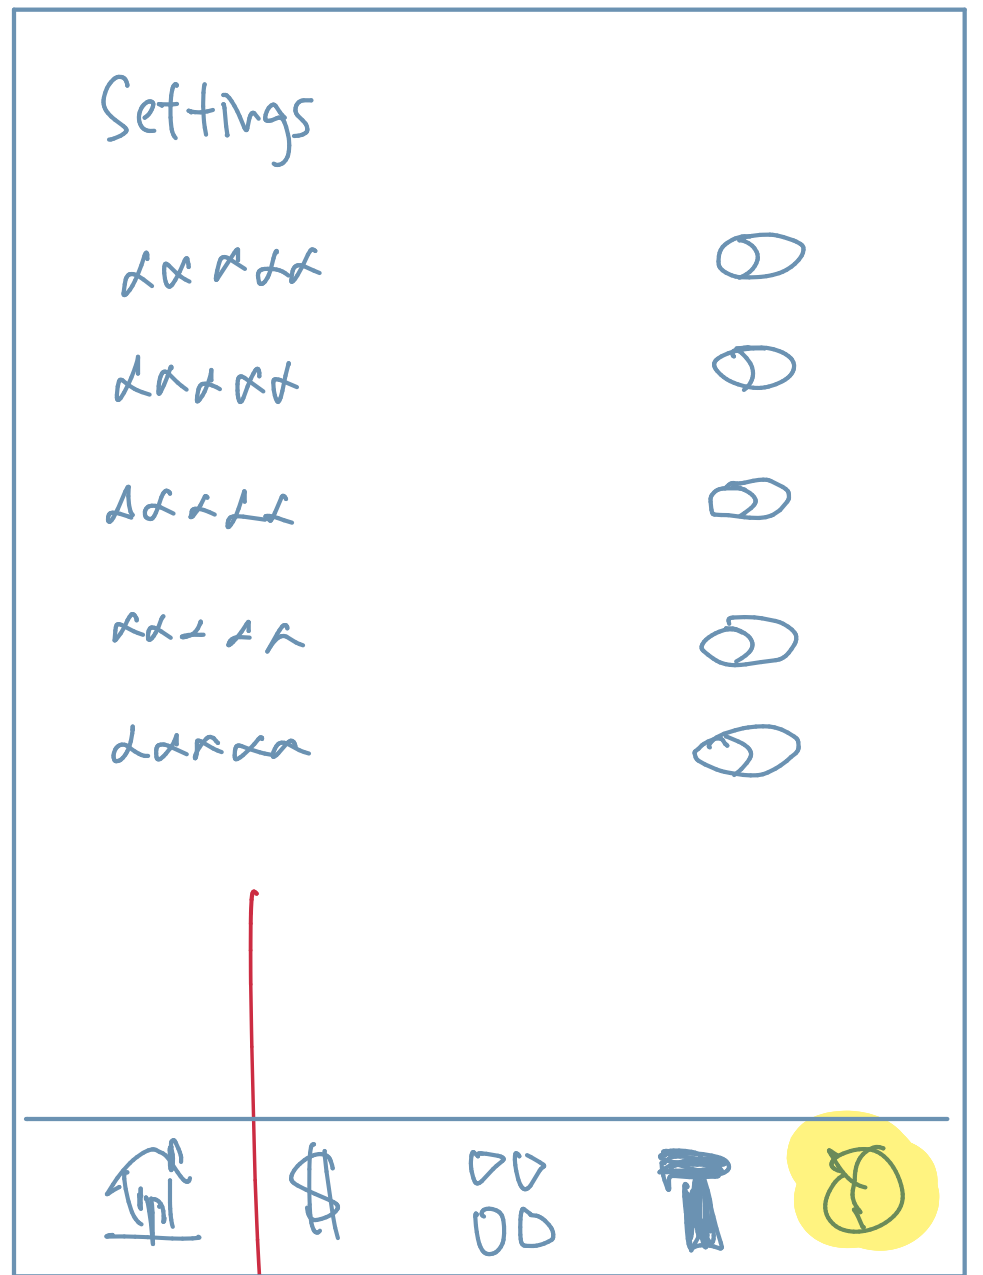

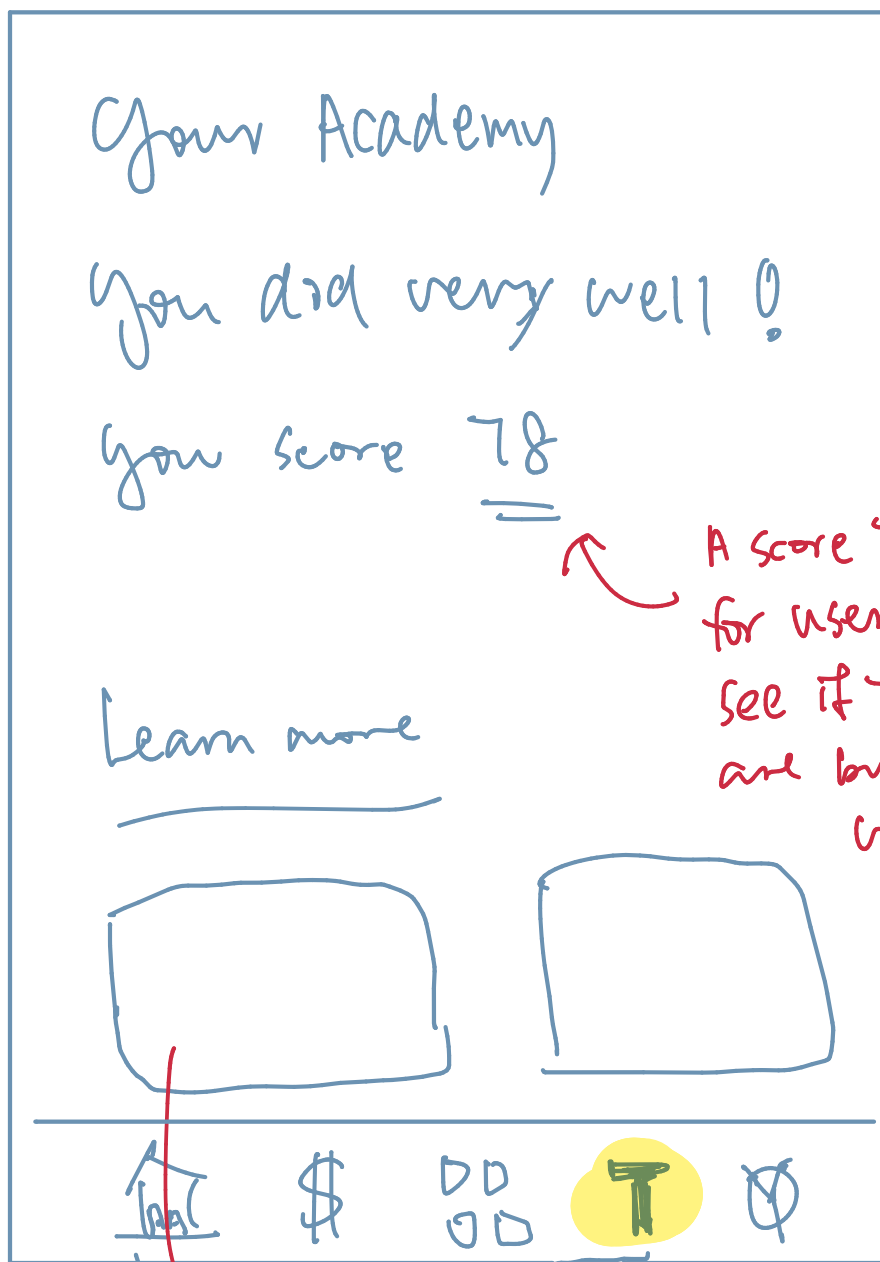

Our Algorithm for calculating the score above:

When $\dfrac{\text{Expense of month}}{\text{Budget of month}} \leq 0.8$,   Score = 100

When $\dfrac{\text{Expense of month}}{\text{Budget of month}} > 0.8$,   Score = $100^{1.8 - \frac{\text{Expense of month}}{\text{Budget of month}}}$

∴ When the expense == budget, a passing score of 40 will be shown.
